**Subject:** [Bureau-of-emergency-medical-services] Personal Protective Equipment (PPE) Burn Rate Calculator  
**Attachments:** ATT00001.txt

Hello everyone,

The personal protective equipment (PPE) burn rate calculator is a spreadsheet-based model that provides information for healthcare facilities to plan and optimize the use of PPE for response to coronavirus disease 2019 (COVID-19). Similarly, non-healthcare facilities may find this tool useful for planning and optimizing PPE use as part of the response to COVID-19. Please visit <https://www.cdc.gov/coronavirus/2019-ncov/hcp/ppe-strategy/burn-calculator.html> for more information.

As a reminder, **all healthcare PPE requests need to go through the Healthcare Coalitions (HCCs)**. The request form and information for healthcare providers and agencies on how to request PPE resources can be found at this page: <https://health.mo.gov/living/healthcondiseases/communicable/novelcoronavirus/professionals.php>

If you have any questions regarding your orders, please contact your local HCC representative.
